EDUCATION

B.S., Software Engineering

August 2025 – December 2027

San Jose State University, San Jose, CA, GPA: 3.628

Coursework: Data Structures and Algorithms, Object-Oriented Design, Software Engineering class

A.S., Computer Science

January 2023 – May 2025

Evergreen Valley College, San Jose, CA, GPA: 3.681

JOB EXPERIENCE

Computer Science Tutor

January 2024 – May 2025

Evergreen Valley College, San Jose, CA

- Coordinated with instructor to deliver a better understanding of basic Java programming to students, delivering lessons on application development using VSCode and instructed the use of standard syntax, and saving 20% in time spent rewriting code sequences
- Diagnosed weakness in students' understanding of basic object-oriented programming and structured, improving assignment scores by 10% and code quality submissions
- Eliminated recurring syntax and logic errors by introducing live debugging techniques in lab sections

PROJECTS

PhotoGuard - Full-Stack Developer

April 2026

SJHacks2026, San Jose, CA | GitHub: <https://github.com/khainguyen21/SJHacks2026>

- Built a full-stack image protection web application with a React/TypeScript frontend and FastAPI backend, supporting account sign-up/login and image upload, retrieval, and download workflows
- Implemented visible and invisible image watermarking with OpenCV and NumPy; embedded watermark text by modifying mid-frequency coefficients in 8 x 8 Discrete Cosine Transform (DCT) blocks
- Designed REST API endpoints for image listing, watermark generation, download, deletion, sharing, and access revocation, with UUID-based local file storage

Travel Booking Platform — Backend Developer

January 2026 – May 2026

San Jose State University, San Jose, CA | GitHub: <https://github.com/SnellyCS/cmpe131-Project>

- Built 5 REST API endpoints across attraction search and hotel search/reservation resources in a Spring Boot backend, collaborating with a 6-person team through the full controller-service-repository stack
- Designed and implemented a custom pet-friendly filtering service to let users refine hotel search results by pet policy, adding business logic beyond standard CRUD operations
- Structured DTOs and a relational database schema to persist hotel and reservation data, supporting reliable data flow between the API layer and storage

SKILLS AND SPECIALIZATIONS

Programming Languages: Java, Python, JavaScript, C++, SQL, HTML, TypeScript

Software: Figma, VS Code, GitHub, Git, Docker, Office365
